

Top 3 Tips to Save Money on Your Car Insurance Policy

Always Shop Around - Loyalty Rarely Pays

One of the biggest myths in the insurance world is that staying loyal to your current provider will reward you with better rates. In reality, loyalty often leads to higher premiums. As Martin Lewis from MoneySavingExpert regularly advises, shopping around before renewal is one of the easiest ways to cut costs.

Don't accept your renewal quote without question. Use a comparison site like Einsure.uk to view prices from a wide range of insurers in just a few minutes. You'll often find that the same provider offers a cheaper deal to new customers via comparison tools than they do through a direct renewal.

Top Tip: The best time to compare quotes is around 23 to 26 days before your policy renews - this is when insurers tend to offer the most competitive prices, according to MoneySavingExpert.

Adjust Your Excess and Avoid Unnecessary Extras

Tweaking your voluntary excess (the amount you agree to pay in the event of a claim) can help reduce your premium. Generally, the higher your excess, the lower your premium - just make sure it's an amount you can realistically afford to pay if you do need to make a claim.

Also, review your policy extras. Some add-ons like breakdown cover, courtesy cars, or legal protection might already be covered elsewhere. Only pay for what you actually need.

When using Einsure's comparison system, you can easily adjust these options to find the right balance between cost and cover.

Make Sure Your Details Are 100% Accurate

When applying for car insurance, accuracy is crucial. Providing incorrect or incomplete information can not only lead to higher premiums, but may also invalidate your policy in the event of a claim.

Some key areas to double-check:

- Your annual mileage
- Where your car is kept overnight
